

Equipment Solutions for your Terminal Projects

OFFERING:

- MV distribution options
- Electrical buildings
- Transformers
- VFDs
- Switchgear
- Motor controls
- Motors
- More

Crescent Power Systems has executed a number of successful projects for the storage and transportation of products to and from terminals, connecting to utilities to distribute power from substations to facilities to loads.

It doesn't matter if you're loading or unloading product or if you need outdoor or indoor gear—we've got the solution!

TO MEET YOUR:

- Space constraints
- Budget
- Schedule
- More

OTHER TERMINAL PROJECTS

- Trafigura/Impala
- Magellan
- TDWP
- TXIT
- Marathon

While we service a wide variety of industrial and utility customers, we got our start with marine terminal work. Our largest project to date entailed supplying a complete electrical package for one of the largest energy infrastructure companies in North America.

SCOPE

- Main Switchgear (12,470V)
- Capacitor Banks
- Pad Mounted Transformers
- 4160 V Switchgear and Motor Control
- 480V Switchboards and Motor Control
- 480V Variable Frequency Drives
- Electric Rooms & Accessories
